RICHARDSON POLICE DEPARTMENT

SIMUNITIONS SAFETY BRIEFING

Cadet Handout | FX Marking and Securiblank Training with the Glock 45T

THE ROUNDS WE USE (GLOCK 45T ONLY)

- FX 9mm Marking: fires a marking projectile. Full protective gear required. Program standoff: 3 feet.
- Securiblank Loud: no projectile. Realistic sound and recoil. Eye and ear protection required. Minimum standoff: 3 feet.
- Securiblank Quiet: no projectile, no flash, no sound. Eye protection required. No minimum standoff distance.
- Every round is fired only through the Glock 45T, a dedicated factory training pistol that cannot chamber or fire duty ammunition. No other round is approved for Cadet use.
- Manufacturer minimum for FX is 1 foot. Our program raises it to 3 feet for added safety.

REQUIRED GEAR

- FX Marking, mandatory: FX 9003 helmet, throat protector, and groin protector (everyone, male and female). No gear, no entry.
- FX Marking, optional: gloves. Recommended: long pants and a long sleeve shirt or hoodie. Covered skin bruises; bare skin welts.
- Securiblank Loud: eye AND hearing protection required.
- Securiblank Quiet: eye protection required.
- Gear missing, damaged, or fogged? You do not enter until it is fixed or replaced.

THE 3-TIME SAFETY CHECK

- 1. Self check: pockets, waistband, bags. No firearms, ammunition, knives, OC spray, or Tasers.
- 2. Buddy check: a partner physically checks you. It goes both ways.
- 3. Safety Officer check: the final check before you cross into the training area.
- Applies to everyone: cadets, officers, role players, and observers. Leave the area for any reason and you get all three checks again. NO EXCEPTIONS.

THE SECURE TRAINING AREA

- One controlled entry point, monitored at all times.
- Nothing live inside: no live firearms, ammunition, knives, OC spray, or Tasers. No cartridges in pockets, ever.
- Every Glock 45T and magazine is issued and accounted for by the Safety Officer.
- Personal gear stays staged outside the area.
- Re-entry means re-check. No exceptions for anyone, of any rank.

WHO IS IN CHARGE

- Safety Officer: controls the area and entry point, runs all checks, issues all weapons, magazines, and gear, declares SCENARIO HOT and COLD, and can stop training at any moment. Final authority on all safety matters.
- Officer in Charge (Primary Officer): runs the scenario, in charge of safety and the 3-time checks, briefs you, commands load and make ready, starts and stops each evolution, leads the debrief. The OIC may also serve as the Safety Officer and may appoint assistant safety officers.
- Only certified Simunitions instructors are authorized to run Simunitions scenarios. If a certified Simunitions instructor is not present, no Simunitions scenarios will be allowed.

COMMANDS YOU MUST KNOW

- SCENARIO HOT: the area is live and weapons may fire. All gear on and staying on. No one enters or leaves. Called only by the Safety Officer or OIC.
- SCENARIO COLD: called only after a full head count and every weapon is cleared and checked. The ONLY time masks and gear come off. Weapons and magazines go back to the Safety Officer.
- Never assume. If you did not hear the call, the area is HOT.
- INDEX: one word ends everything, immediately. Anyone can call it, and you will never be in trouble for calling it. Echo INDEX until all action stops, weapons down, freeze, wait for instructions.
- Gear dislodged? Cover the exposed area with your hands, kneel or go prone, and call INDEX. Shots to unprotected eyes cause permanent damage.

CONDUCT RULES

- Treat every weapon as real: muzzle discipline at all times, finger off the trigger until on target.
- The 3 foot rule: never fire FX or Loud rounds at anyone less than 3 feet away. Inside 3 feet, do not fire: yell BANG BANG. Only Quiet blanks have no distance minimum.
- No horseplay. No shooting after INDEX, no brutalizing role players. Horseplay means immediate removal from the scenario and all Simunitions training.
- Stay in your role. Follow the briefing and the OIC. Do not freelance and do not do anything not specifically instructed.
- Report every injury beyond a welt to the Safety Officer immediately.
- Hydrate. Full gear is hot. Tell an instructor if you feel overheated or dizzy.

A protector without capability is just a witness.

Check yourself. Check your buddy. Check again.
